

## OpenSnaproute Automation using "Robot" Framework

\*\*\*\*\*

### Directory Structure:

#### OpenSnaproute Automation Directory-Structure using "Robot" Framework

\*\*\*\*\*

OpenSnaproute\_Drivers----- Contains all the APIs used in the Test-scripts

OpenSnaproute\_Variables----- Contains device informations interms of variables

OpenSnaproute\_Testscripts---- Contains OpenSnaproute LLDP, System, Functional testing Test-suite

LLDP----- Contains OpenSnaproute LLDP testing Test-suite "OpenSnaproute\_Ildp.robot"

FunctionalTest----- Contains OpenSnaproute Functional testing Test-suite "OpenSnaproute\_FT.robot"

SystemTest----- Contains OpenSnaproute System testing Test-suite "OpenSnaproute\_ST.robot"

LLDPV2----- Contains OpenSnaproute LLDP testing Test-suite "OpenSnaproute\_Ildp.robot"(Fetch information from EXCEL)

LSNC\_Lab\_Access\_NSI\_for\_TerraLogic.xlsx----- Contains connection information between routers

### How to run the test-case ?

1. Copy the srfwtf directory into home directory.

2. Open a Terminal, then cd to ~/srfwtf/OpenSnaproute\_Testscripts/Testscript\_name directory

Ex:

/srfwtf/OpenSnaproute\_Testscripts/LLDP

or

/srfwtf/OpenSnaproute\_Testscripts/FunctionalTest

3. Open .robot file, and change the variable \${USER} value to system username.

Ex:

\*\*\* Variables \*\*\*

\$(USER) opensnaproute

//replace "opensnaproute" by your system username

4. Open a Terminal, then cd to ~/srfwtf/OpenSnaproute\_Variables directory

5. Open Variables.py, and if you need to run for all the devices, change device\_all="yes" and to run certain devices change the variable device\_all="no" and mention device count.(For all Testsuite follow same procedure)

Ex:

```
device_all="no"
```

```
fab_count = 1
```

```
csw_count = 2
```

```
asw_count = 1
```

or

```
device_all="yes"
```

6. For LLDPV2 Open Variables.py, and specify the path of EXCEL file and Sheet name

Ex:

```
path = '/home/opensnaproute/Downloads/LSNC_Lab_Access_NSI_for_TerraLogic.xlsx'
```

```
sheet_name="NSI"
```

7. Run the test-suite file : .robot file using the below command.

```
robot filename.robot
```

EX:

```
robot OpenSnaproute_lldp.robot
```

8. Once Test-case execution completed, We will get a log file like:

Output: output.xml

Log: log.html

Report: report.html

9. Then Open the log.html file in any browser for web-based log view.
